

# Healthcare Vendor Network

Efficiently meet compliance requirements and reduce vendor risk

Given the proliferation of electronic health records, a surge in connected medical devices, and an increased reliance on business associates and other third parties, the potential for PHI/PII breaches and compliance audits looms large. The Prevalent™ Healthcare Vendor Network enables you to meet requirements for assessing vendor risk, developing strong IT and OT security and privacy measures, and protecting patient data.

## The H-ISAC's exclusive solution for vendor risk assessment assurance

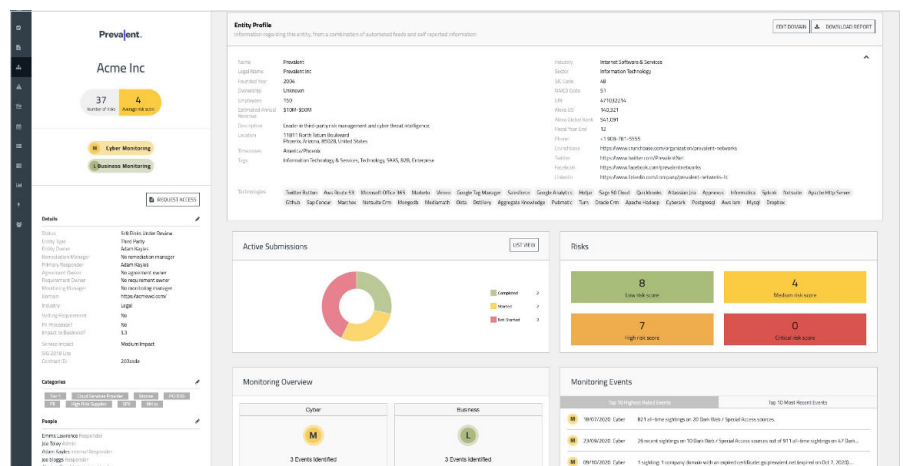

The Prevalent Healthcare Vendor Network (HVN) is an on-demand library of risk profiles on thousands of third parties serving the healthcare industry. HVN members have instant access to clear vendor risk scores based on standardized risk assessment responses, backed by insights from continuous cyber, business and financial threat monitoring.

The HVN is offered exclusively to H-ISAC members under the organization's program for Shared Risk Assessments for Third Parties as the preferred way to accelerate vendor risk management and compliance in the healthcare industry.

## Key Benefits

- Increase focus on risk analysis and remediation by tapping into shared data
- Stop chasing down vendor risk data by outsourcing collection and analysis efforts
- Reduce the cost of TPRM by automating assessment and monitoring processes
- Accelerate vendor evaluations with cyber, business and financial health intelligence
- Select from flexible licensing options tailored to your desired level of oversight
- Meet compliance requirements with a standards-based approach to third-party risk management

The Prevalent Healthcare Network delivers on-demand access to vendor risk scores and evidence based on completed, standardized assessments and continuous external monitoring.

## Key Features

### Standards-Based Assessment Library

Access a database of thousands of completed and verified H-ISAC assessments and supporting evidence. Vendors are reassessed annually or upon your request.

### Workflow and Task Management

Streamline vendor communications and speed remediation efforts by capturing and auditing conversations, assigning tasks, and tracking progress.

### Continuous Cyber, Business & Financial Insights

Transform point-in-time vendor assessments into dynamic intelligence profiles with continuous insights from cyber, business and financial monitoring events.

### Remediation Guidance

Get clear and actionable recommendations for addressing risks identified during assessments. Track and report on issue resolution over time.

### Risk Score Previews

Screen vendors during RFX processes with risk score previews based on inherent/residual risk, internal assessment results, and external monitoring reports.

### Machine Learning Analytics and Reporting

Leverage machine learning analytics to correlate hard-to-track metrics and provide insight into the riskiest vendors, controls and trends.

### Compliance Mapping

Prevalent automatically maps assessment responses to specific regulatory and industry framework requirements, enabling you to quickly verify compliance or justify remediation efforts.

### Outsourced Due Diligence

Save time and money by letting Prevalent experts handle everything from conducting assessments and following up with vendors, to reviewing responses and evidence for accuracy and relevance.

### Automation Playbooks

Efficiently coordinate internal and vendor teams with pre-built playbooks that automate a broad range of onboarding, assessment and review tasks.

### Search and Request Assessments

Search for a specific vendor in the network to access assessment, cyber, business and financial data. Request assessments with a single click.

### Issue Supplementary or Proactive Assessments

Issue additional assessments for fourth-party mapping, certifications, and business profiling. Vendors can also proactively report important events.
