

TEAMCONNECT

TeamConnect enables your legal department to be the best-run function in your organization. By consolidating all critical legal functions and integrating with your daily technologies and processes, TeamConnect provides the single source of truth for your legal department.

SOPHISTICATED

- Fluid control for the most complex needs
- Broad interoperability for smooth integrations
- Adept and experienced company and team

AGILE

- Best-in-class workflow and configurability tools
- Powerful ability to build custom apps
- Actionable, real-time insights and analytics

SUSTAINABLE

- Scalable via add-on modules
- Continual self-sufficiency through configurability
- Low total cost of ownership, requiring no compromises

WHAT OUR CLIENTS SAY ABOUT TEAMCONNECT

“So intuitive and easy to use that users feel empowered by technology.”

The Williams Companies, Inc.

“The spirit of collaboration, spirit of continuous improvement, openness to listening to their customers – these are things Mitratesch does very well.”

AIG

“Mitratesch’s solution is light years ahead of other vendors.”

Express Scripts

CAN YOUR SYSTEM...

- offer matter management, e-Billing, legal hold, GRC, and contract management solutions on a single, integrated platform?
- accommodate all of your budgeting needs with NO customizations?
- scale globally to accommodate thousands of users?

TEAMCONNECT CAN!

TeamConnect is the trusted solution for 25% of the Fortune 500 corporations, including:

TEAMCONNECT

MATTER MANAGEMENT

Increase legal staff efficiency by 5-10% with a flexible legal management system at the center of your operations.

- Central hub for all needs in the matter lifecycle
- Automated business process management to ensure consistent and accurate central records
- Complete control and security
- Powerful platform for legal teams to capture and carry on critical designs and projects
- Expansive document management
- Broad interoperability to integrate with virtually any solution offering a web services layer

GOVERNANCE, RISK, AND COMPLIANCE

Manage compliance and reporting, track regulations and policies, and identify organizational risk.

- Auditable and defensible trail
- Ambiguity of fact elimination, with an obligations library
- Holistic view of exceptions to spot trends
- Best practice procedures based on experiences
- Single click transfer to matter management
- Agile adaptability to board needs
- Increased capacity to generate reports

AUTOMATED CALENDARING

Calculate, calendar, and update court deadlines in just minutes.

- Automatic deadline calculation
- Immediate task, appointment, and deadline updates sent to attorney calendars
- Integrated with Aderant's CompuLaw
- Protecting the legal department against missed deadlines and costly errors
- Decreasing deadlines research and calculation time from two hours to less than five minutes

E-BILLING

Reduce expenses by more than 5% with automatic invoice review, vendor management, and rate negotiation structure.

- Multi-currency capability to support global organizations
- Automatic creation of budgets
- Time period and matter phase budget tracking and reporting
- On-the-go invoice approval
- Two-way integration with AP systems
- Automatic translation of manual or LEDES format invoices

CONTRACT MANAGEMENT

Increase collaboration with business users through end-to-end contracts lifecycle management.

- Consistent format for contracts and documents using wizards
- Each contract is fully integrated into the legal management system
- Integrated with Microsoft Office suite for version control and an auditable trail of all changes
- Configurable workflow and notification settings throughout the contract lifecycle

LEGAL HOLD

Mitigate litigation risk while saving attorney time.

- Early identification of matters requiring legal hold
- Integrated with HR database to select custodians
- Increased visibility throughout the legal hold lifecycle
- Auditable trail of email notices sent to custodians and non-TeamConnect users
- Real-time tracking agreement and compliance
- Greater control of discovery with central storage
